JED STOUT

Technical Project Manager

Park City, UT | jedstout@gmail.com | linkedin.com/in/jedstout | github.com/JedStout

SUMMARY

Results-driven Technical Project Manager with 8+ years of experience leading cross-functional software teams in government and enterprise environments. Proven track record managing large-scale application migrations, coordinating legislative stakeholders, and delivering complex technical initiatives on time. Combines hands-on software development expertise with strategic project leadership to bridge the gap between engineering teams and business objectives.

CORE COMPETENCIES

Project & Program Management • Agile / Scrum • Stakeholder Communication • Application Migration • Cross-functional Team Leadership • Risk Management • SDLC • Git / CI-CD • Jira • Federal Compliance • Vendor Management • Technical Requirements Gathering

PROFESSIONAL EXPERIENCE

Volunteer Manager & Project Manager | *State of Utah — Legislature* Jun 2022 – May 2024

- Stepped into a critical leadership gap, managing a team of 12 developers through a high-stakes organizational transition with zero project delays.
- Oversaw simultaneous migration of 200+ legacy applications across the Utah House and Senate, coordinating with elected officials and legislative staff as key stakeholders.
- Established project timelines, sprint planning, and cross-team communication protocols that became the baseline process for the department.
- Served as primary liaison between technical teams and legislative leadership, translating complex technical requirements into actionable project scopes.
- Managed multiple concurrent projects within scope and on schedule by coordinating tasks, dependencies, and resource allocation across teams.

Software Developer | *State of Utah — Legislature* Jun 2022 – May 2024

- Led the Applications Upgrade and Migration project — the largest modernization initiative in the legislature's recent history.
- Utilized Git for version control and continuous deployment, maintaining smooth transitions across dev, test, and production environments.
- Spearheaded a data migration initiative that significantly improved data accuracy and accessibility for legislative operations.

Content Management Specialist | *Schatz Publishing Group (GSA.gov)* Jun 2024 – Jan 2026

- Managed content operations at scale across a large federal web platform, coordinating with design, engineering, and compliance stakeholders.
- Oversaw end-to-end content lifecycle across two separate CMS platforms, enforcing AP style, GSA branding standards, and Section 508 accessibility requirements.
- Leveraged proprietary AI tooling to streamline workflows and identify quality and accessibility issues across thousands of pages.

Software Developer II | *MasterControl* Mar 2021 – Apr 2022

- Delivered bug fixes and improvements across legacy ColdFusion, C++, and JavaScript codebases in a regulated software environment.

- Coordinated weekly deploys and integrations, maintaining quality standards across front-end and back-end systems.

DevOps & QA Specialist / Software Engineer | *Assure Services* Sep 2018 – Mar 2019

- Coordinated QA results and deployment pipelines across multiple teams in a fast-paced agency environment.
- Managed branch merges and release processes, ensuring correct functionality across simultaneous workstreams.

Front End Developer / Marketing Specialist | *Overstock.com* Feb 2015 – Sep 2018

- Streamlined marketing operations, restructuring a 4-person team function into a 2-person operation without loss of output.
- Managed SQL database of 400,000+ on-sale products and executed Overstock's most successful Black Friday/Cyber Monday campaign on record.

FOUNDER & OPERATOR

Placer Point Dynamics, LLC | *Park City, UT* Jan 2026 – Present

- Leading all functions from product development and go-to-market strategy to finance and partnerships for a technology ventures firm.
